Flat Top
10g x 16mm
(Self Drilling)

Tools Required

To assemble Kwiktech designs.

Tape
Measure

Marker

Power Drill or
Impact Driver

No 2.
Phillips
Head Bit

Hex 5 Bit
and/or
Allen Key

5/16"
Hex
Socket

Safety
Glasses

Metal Cutting
Tool for DIY
Cutting

Adjustable
Spanner

Additional safety, clamping and access equipment maybe required at the users discretion.
3.5mm and 13mm Ø drill bits will be required for some frame work designs.

Rail Assembly

Fit Rail Insert as shown both ends.

Installation Types

There are 3 typical different ways to install the **Universal Connector** to a 50x50 hollow member.

Upright Fit

Outside Fit

Inside Fit

Rail Positions

When following the dimensions stated on Kwiktech drawings, the angles will be predefined by the **Universal Connector** placement and rail length. Just select the correct hole when fitting.

0°

0° - 22.5° Angles

33.75° - 45° Angles

60° Angle

Reading Drawings

When reading Kwiktech drawings the dimensions will refer to these centre positions on the **Universal Connector**.

Extra Strong Rail Assembly

Fit Rail Insert as shown both ends. 2x additional screws to fix Rail Insert only when specified on drawings. Assembly wedge supplied in some Kwiktech DIY Kits.

Start fixing screws from the end closest to the Rail Insert. Temporary wedge or clamp to assist securing steel members together. Remove wedge after first screw is fixed.

Load Displacement Plate Assembly

Only needed where specified on drawings. Used to strengthen light-gauge member wall surface.

Tension Strapping

10gx16 Self Drilling small head Flat Top Screws (Screw B) used for all steps.

2 Screws used at each end of Strapping. Refer to **Kwiktech Trusses Manual** for member cut lengths & Universal Connector positioning measurements.

90° Intersection

95mm long strap

95mm long strap

Double Intersections

0° member

50 to 50 Corner Brace

Refer to “Easy Frame DIY” on the Kwiktech website for cross bracings from 1m x 1m up to 2.4m x 2.4m in 100mm increments.

Example 1

Post Connector

Click fit to 50x50 posts.

Press and click both Post Connectors onto 50x50 SHS

Screw fix to the SHS

Place Rails in correct hole position and angle

Secure Rails as per standard Rail Assembly

Option; Attach larger hollow section for longer spans

Fencing Assembly

Insert Rail Inserts into the 38x25 rails and screw fix

Attach Post Connectors at the correct angle for your desired perimeter and lightly fit with Socket-head Cap Screws

Align Post Connectors. Click onto the 50x50 SHS post

Level fence panels and screw fix in position, then tighten all Socket-head Cap Screws

Square Perimeter
45° Connection

5.6m²
(2.4m long panels)

Octagon Perimeter
22.5° Connection

27.8m²
(2.4m long panels)

Polygon Perimeter
Different Angle Connections

13.2m²
(2.4m long panels)

Star Picket Stopper & Cap

Standard Star Picket to be a minimum of 400mm longer than its 50x50 post.

Fit bolt through top hole in star picket & secure with nuts

Lower star picket stopper into the 50x50 member

Place star picket through the designated slot

Hammer star picket down until bolt assembly rests in the stopper

CAUTION: Stopper not designed for impact. Do not continue to hammer once bottomed on stopper

Press and click cap onto stopper unit

Additional Bracing Options

Finished assembly
